The Project

This project aimed to continue on the two previous ETUCE and EFEE projects focusing on social dialogue capacity building. The projects demonstrate the education social partners’ will to work sustainably on the improvement of their social dialogue and towards stronger and more effective results at European level, which could better serve the member organisations at national level. While the two previous ESSDE capacity building projects focused on EU Member States and EU-Candidate countries with a more recent social dialogue tradition, or where social dialogue was weakened due to the economic crisis, this project moved to the next stage and included countries which did not need to focus on capacity building due to their long and solid social dialogue tradition. Instead, the process of strengthening the links between national and European social dialogue was addressed. Rather than restricting the agenda on the functioning of social dialogue, national participants selected topics from the current ESSDE Work Programme and can now feed the ESSDE with the results of their debates.

The Advisory Group consisting of representatives from Denmark (DLF), Finland (OAJ), Ireland (IFUT), Italy (UIL Scuola), Luxembourg (SNE), Malta (MUT), Netherlands (AOb), Portugal (FNE), ETUCE and EFEE has led the project and organised all activities. To date, European and national social partners’ Round Table meetings conducted in Dublin, Porto, Utrecht, Rome, Malta and Luxembourg brought together national social partners with ESSDE delegates, related stakeholders and external experts at national and at European level, to discuss topics from the ESSDE Work Programme with relevance to the national contexts. By addressing the implementation of selected ESSDE Work Programme topics at all levels, this project is intended to further develop the capacity for a meaningful and effective European education social dialogue.
Objectives of the Conference

• To present the outcomes of the project. The project expert’s report is the occasion for education trade unions to debate on what the future of the European Sectoral Social Dialogue in Education (ESSDE) will look like and how to contribute to the European education policy building;

• To strengthen and enhance the knowledge and involvement of education trade unions in the ESSDE;

• To concentrate on further strategies aimed on the continuous improvement of the social dialogue processes and the permanent enhancement of the social partners’ capabilities to apply a culture of co-operation and debate as the necessary prerequisite for an effective national and European social dialogue;

• To foster the emergence of a culture of trust and co-operation between all ESSDE delegates and to integrate member organisations from EU candidate countries at an early stage;

• To identify, explore and share good practice examples in terms of objectives, strategies and lessons learnt from the project activities and to strengthen the links between the European level and the national level social dialogue;

• To generate fruitful debates between ETUCE and EFEE member organisations and all relevant stakeholders on the key challenges and possible solutions regarding joint priorities laid out in the ESSDE Work Programme 2018-2019;

• To give EFEE and ETUCE member organisations the opportunity to interact with the European social partners and gain a deeper mutual understanding of national issues across Europe and the role of the social partners in promoting quality education.
